## Vytvoření uživatelských účtů

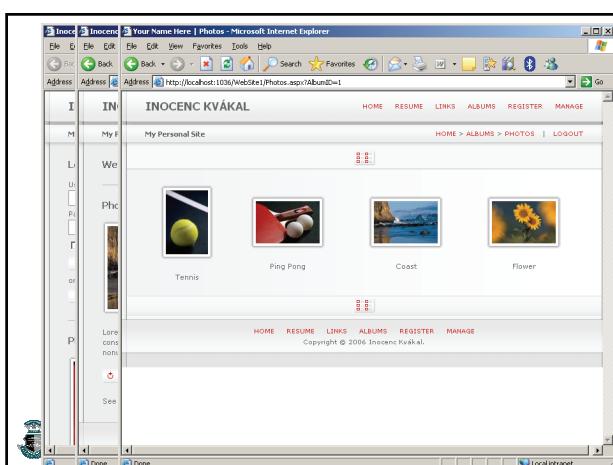

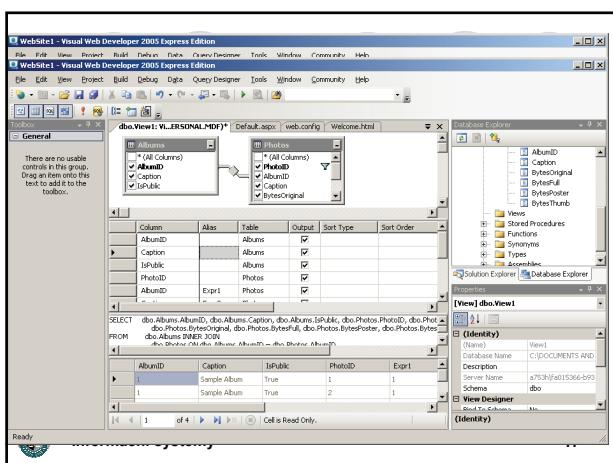

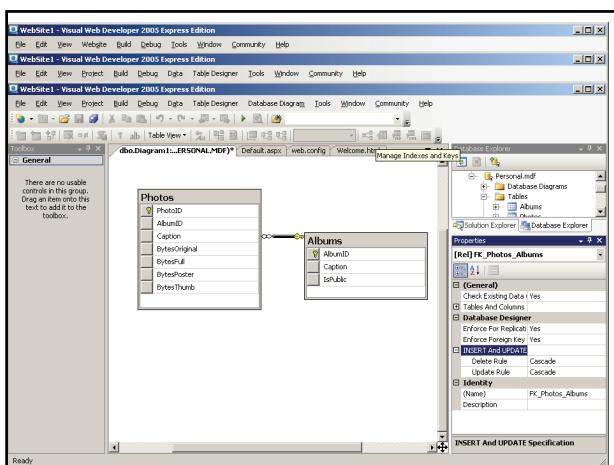

- To create an administrative user

- Run the site at least once before proceeding. This ensures the initialization of the Membership and Roles databases.
- In the Website menu, click **ASP.NET Configuration**.
- Click the **Security** tab.
- Click **Create user**.
- In the **Create User** box, type a user name, password, and e-mail address for the administrator user. You must also provide a security question and answer that is used to help you recover your password, if necessary.
- In the **Roles** box, select both the **Administrators** and **Friends** check boxes to make the user into an administrator and a member of the Friends role.
- Click **Create User**.
- Close the Web Site Administration Tool window.
